

**Restrictions on use of SynQuest products:**

SynQuest's products are intended primarily for laboratory research purposes by personnel trained in the safe handling and use of hazardous materials. Products are not to be used for any other purposes, including but not limited to, *in vitro* diagnostic purposes, in foods, drugs, medical devices, or cosmetics for humans or animals, or for commercial purposes.

Buyer acknowledges that SynQuest's products have not been tested by SynQuest for safety and efficacy in food, drug, medical devices, cosmetic, commercial or any other use. Furthermore, Buyer expressly represents and warrants to SynQuest that Buyer will properly test, use, manufacture, and market any products purchased from SynQuest and/or materials produced with products purchased from SynQuest in accordance with the practices of a reasonable person who is expert in the field and in strict compliance with all applicable laws and regulations, now and hereinafter enacted. Buyer further warrants to SynQuest that any material produced with products from SynQuest shall not be adulterated or misbranded within the meaning of the Federal Food, Drug and Cosmetic Act and shall not be materials which may not, under Sections, 404, 505, or 512 of the Act, be introduced into Interstate commerce.

Many of the products listed herein are experimental and, therefore, not listed on EPA's Toxic Substance Control Act (TSCA) inventory. Buyer assumes responsibility to assure that the products purchased from SynQuest are approved for use under TSCA, if applicable. If it is anticipated that any material purchased from SynQuest is to be used for commercial purposes, it is imperative that you call SynQuest FIRST. Buyer acknowledges that even if specific items are listed on the TSCA inventory, they may NOT be used for commercial purposes if the intermediates from which they were made are not also included on the TSCA Inventory. ALL PRODUCTS FROM SYNQUEST ARE SOLD FOR RESEARCH AND DEVELOPMENT USE ONLY AND MUST BE USED ACCORDING TO THE PROVISIONS OF 40CFR 720.36.

SynQuest assumes no responsibility for the accuracy or completeness of any information regarding the hazardous nature neither of the listed products nor of their suitability for any intended use. More comprehensive information is available on the MSDS. All chemicals listed by SynQuest should be treated as potentially harmful – the absence of a warning label does not mean a product is harmless. Furthermore, Buyer has the responsibility to verify the hazards and to conduct any further research necessary to ascertain the hazards involved in using products purchased from SynQuest. Buyer also has the duty to warn Buyer's customers and any auxiliary personnel (such as freight handlers, etc.) of any risks involved in using or handling the products.

Application or process patents may apply to chemicals listed herein. The Buyer assumes responsibility for determining the existence of, and avoidance of infringement of, such patents.
