

Capability Statement

www.synquestlabs.com

SynQuest maintains focus on fluorine chemistry, as well as extending our range of reagents with new materials requested by our customers and from our internal R&D programs for the development of new products.

Since the acquisition of SynQuest by Central Glass (Japan) in 2002, our two companies have worked together, closely taking advantage of the different strengths to be found in each organization. Central Glass Group can offer customers a seamless transition from small scale laboratory research and pilot scale at Synquest, through to full commercialization at Central Glass Germany and Japan. SynQuest is a bulk stocking location of Central Glass products, particularly Trifluoromethanesulfonic acid and Trifluoromethanesulfonic anhydride. (Central Glass is the world's largest manufacturer of Trifluoromethane sulfonic acid.)

Large Scale Production

CORE COMPETENCIES

Chemical Services

- Research Chemicals Catalog
- Custom Synthesis & Manufacturing
- Bulk Chemicals

ADVANTAGES

At SynQuest we recognize that a research chemicals catalog business is a service industry. Our aim is to provide first class service by responding quickly to your inquiries, offering competitive prices, many unique products, timely shipments, and by providing competent technical support.
